

NEST

**North Carolina
Energy Savings Taskforce**

Join NEST...

The North Carolina Energy Savings Taskforce (NEST) leverages your expertise and customer contacts to help our State reach energy efficiency goals.

By agreeing to share information about how to reduce energy consumption, and about incentives to reduce the costs of converting, you can become a member of NEST. As a NEST program participant, you receive up-to-date training at no charge. Participants may also qualify to receive incentives for conducting residential energy audits.

NEST SEMINAR CONTENT Fall 2011

As a NEST program participant, you receive up-to-date training at **no charge**. Participants may also qualify to receive incentives for conducting residential energy audits.

Please visit www.NcEST.org for schedule updates.

Seminars begin at 8:30 a.m., and conclude before 2p.m. Lunch is included.

NEST seminars cover...

- Energy surveys: essential information required.
- Conducting commercial and residential energy audits.
- How to assess heat pumps, lighting, switches, appliances, insulation, and more.
- How to calculate the energy savings.
- Reporting the results to your client.
- Utility Incentive programs- *Why is the utility paying me to be less of a customer?*
- Connecting customers to utility incentives.
- Power reduction products; CFLs, LEDs, dimmers, occupancy sensors, 13+ SEER heat pumps, energy star rated appliances, windows, insulation.
- Power monitoring products.
- Energy Saving Products: Lamps, ballast, controls, LED, Solar LED.
- *How lighting and heating our home and offices changes under Epact2005*: program overview of federal regulations and new tax deductions for energy saving projects.
- Recycling of old lamps and ballasts
- Commercial/Industrial training program overview
- Taskforce Recruitment, reporting requirements

NEST

**North Carolina
Energy Savings Taskforce**

Who we are...

The North Carolina Energy Savings Taskforce (NEST) provides training to service providers interested in receiving current information regarding energy efficiency regulations, incentives and technology.

By agreeing to share the information with their customers, NEST program participants receive the training at no charge. Participants may also qualify to receive incentives for conducting residential energy audits.
